Imprägnierung und Farbvertiefung/
Impregnation and colour enhancer

Schützen Sie Wertvolles!

Wenn Sie sich dafür entscheiden, Ihre Wohn-& Lebensbereiche mit einem hochwertigen und einzigartigen Naturprodukt zu veredeln, sollten Sie dieses auch entsprechend schützen. Imprägnieren Sie die Natursteinmosaike oder Fliesen zum Fleck-&Färbungsschutz nach der Verlegung und vor der Verfugung mit einem natursteingeeigneten Fleckschutz.
Sofern eine farbkräftige Oberfläche gewünscht wird, ist die Fläche nach der Verfugung mit einem natursteingeeigneten Farbvertiefer zu behandeln. Beispielfotos finden Sie zur Veranschaulichung nachfolgend.

Protect the valuable!

If you choose to furnish your living areas with a high-quality and unique natural product, you should also protect it accordingly.
Impregnate the natural stone mosaic or tiles with a stain protector suitable for natural stone, for protection against stains and to protect the colour, after laying and before grouting.
If a more coloured surface is desired, the area has to be treated with an colour enhancer suitable for natural stone, after grouting. See photos with examples below for illustration.

Hinweise/Notes

Bitte beachten Sie, dass es sich bei Natursteinmosaik, -fliesen, -platten, -rosonen, -bordüren um ein Naturprodukt handelt. Daher kann es beim Abbau und bei der Herstellung des Materials zu natürlich bedingten Farbabweichungen und Schwankungen kommen. So können auch die zur Verfügung gestellten Muster und/oder Bildmaterialien Abweichungen zur tatsächlich gelieferten Ware aufweisen. Dies stellt keinen Mangel dar.
Bei unserer Naturstein-Antikserie, werden die rustikal getrommelten Kanten durch Einlage in eine Trommel, mithilfe von Kieseln und keramischen Bodies, durch drehende Bewegungen erzeugt. Bei diesem Prozess kann es zu linsenartigen Abplatzungen des Materials kommen. Das Ergebnis des antikisierens ist in der Materialstruktur bedingt. Die Oberfläche ist auch an der Ausplatzung antik weich und nicht rauh gespalten.
Im Gegensatz zu Marmor, weisen die Travertin Sorten darüber hinaus auch große offenporige Oberflächen auf, dies ist bei Travertin normal und gewünscht. Darüber hinaus, finden sich wie bei Marmorsteinen ebenfalls auch Erzadern und sonstige geologische Einschlüsse.

Please note, that natural stone mosaic, tiles, plates, rosettes and borders are a product from nature. Therefore, there may be natural colour deviations and fluctuations during the dismantling and production of the materials. that is why our samples and/or provided images may also differ from the actually delivered goods. It does not constitute a defect.
The rustic tumbled edges of our natural stone antique series are made in a rotating trommel with the help of pebbles and ceramic bodies. During this process lenticular spallings may occure.
The result of the aging process is given by the structure of the material.
The surface is at the spalling has still an antique soft and not a rough cleaved touch.
In contrast to marble, the travertine varieties also have large open-pored surfaces, which is normal and desired for travertine. In addition, there are also ore veins and other geological inclusions like in marble stone.
