BUTTERFLY DESIGN

Original „butterfly“ design, made from hand-chipped glass mosaic in colors of precious metals appears like a jewel in the interior, a jewel that can elevate any room to a higher level.

ART

High gloss of glass metallic mosaic with hallmark brightens the walls floor or ceiling.

Flakes of real gold are sealed onto the glass chips, in color combinations of gold, silver and bronze with smooth or wavy effect, in the size of 15x15mm.

CLASSIC

Glass mosaic with color-infusion amazes by its depth. Glass thickness of 8mm creates a striking appearance on large surfaces. Standard mixes are available in gold, silver, bronze and ivory shades. Mosaic chips of 15x15mm offer endless variations of creating endless color combinations and designs.

STONE

Exceptional appearance is given by a mix of color-infused glass with natural stone. A mosaic with the larger format tiles then creates a perfect ombination. Here we bring to market revolutionary technology-composite tiles.

It based on the use of ceramic tiles, on which a layer of natural stone is pressed or glued.
